A. Google Compute Engine and Cloud Deployment Manager
B. Google Compute Engine, Jenkins, and Cloud Load Balancing
C. Google Container Engine and Cloud Load Balancing
D. Google Container Engine, Jenkins, and Helm
Answer: B
Explanation:
Jenkins is an open-source automation server that lets you
flexibly orchestrate your build, test, and deployment
pipelines. Kubernetes Engine is a hosted version of Kubernetes,
a powerful cluster manager and orchestration system for
containers.
When you need to set up a continuous delivery (CD) pipeline,
deploying Jenkins on Kubernetes Engine provides important
benefits over a standard VM-based deployment Incorrect Answers:
A: Helm is a tool for managing Kubernetes charts. Charts are
packages of pre-configured Kubernetes resources.
Use Helm to:
Find and use popular software packaged as Kubernetes charts
* Share your own applications as Kubernetes charts
* Create reproducible builds of your Kubernetes applications
* Intelligently manage your Kubernetes manifest files
* Manage releases of Helm packages

NEW QUESTION: 2
A solutions architect needs to ensure that API calls to Amazon
DynamoDB from Amazon EC2 instances in a VPC do not traverse the
internet What should the solutions architect do to accomplish
this? (Select TWO)
A. Create a security group entry in the default security group
to provide access
B. Create a route table entry for the endpoint

C. Create an ENI for the endpoint in each of the subnets of the VPC
D. Create a gateway endpoint for DynamoDB
E. Create a new DynamoDB table that uses the endpoint
Answer: B,D
Explanation:
A VPC endpoint enables you to privately connect your VPC to supported AWS services and VPC endpoint services powered by AWS PrivateLink without requiring an internet gateway, NAT device, VPN connection, or AWS Direct Connect connection. Instances in your VPC do not require public IP addresses to communicate with resources in the service. Traffic between your VPC and the other service does not leave the Amazon network.
Gateway endpoints
A gateway endpoint is a gateway that you specify as a target for a route in your route table for traffic destined to a supported AWS service. The following AWS services are supported:
Amazon S3
DynamoDB
https://docs.aws.amazon.com/vpc/latest/userguide/vpc-endpoints.html

NEW QUESTION: 3

Refer to the exhibit. The firmware fails while using AutoInstall. What could cause this issue?
A. A maximum of two active partitions is permitted when using AutoInstall.
B. The bootflash partition exceeded 70 percent of the capacity of the flash drive.
C. The workspace partition must be at least 10 percent of the flash drive.
D. The license for the Advanced Services Package must be installed.
Answer: B
