NEW QUESTION: 1

Bei der Teilnahme als Mitglied eines Systementwicklungsteams sollte der IS-Prüfer Folgendes beachten:

- A. Die Fähigkeit des Auditors, nach der Implementierung eine unabhängige Bewertung des Antrags durchzuführen, wird beeinträchtigt.
- B. Der Prüfer sollte vor der Teilnahme am Projektteam eine Unabhängigkeitserklärung unterzeichnen.
- C. Als Kontrollspezialist kann der Prüfer dem Projektteam einen erheblichen Mehrwert bieten, indem er die endgültige Entscheidung über bestimmte Kontrollen trifft.
- D. Für eine fortlaufende Evaluierungsfähigkeit sollte der Auditor sicherstellen, dass Computer-Audit-Software in allen Anwendungen implementiert ist.

Answer: A

NEW QUESTION: 2

You have a Microsoft 365 subscription.

You have a group named Support. Users in the Support group frequently send email messages to external users.

The manager of the Support group wants to randomly review messages that contain attachments.

You need to provide the manager with the ability to review messages that contain attachments sent from the Support group users to external users. The manager must have access to only 10 percent of the messages.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer :

Explanation:

Explanation

Supervision policies in Office 365 allow you to capture employee communications for examination by designated

reviewers. You can define specific policies that capture internal and external email, Microsoft Teams, or 3rd-party communications in your organization. You create supervision policies in the Compliance center. These policies define which communications and users are subject to review in your organization and specify who should perform reviews.

If you want to reduce the amount of content to review, you can specify a percentage of all the communications governed by a supervision policy. A real-time, random sample of content is selected from the total percentage of content that matches chosen policy conditions.

NEW QUESTION: 3

- A. Option B
- B. Option C
- C. Option D
- D. Option A

Answer: A

Explanation:

Explanation

If the RAID controller fails and is replaced with a RAID controller with a different brand the RAID will break.

We would have to rebuild a new RAID disk, access and restore the most recent backup to the new RAID disk.

Note: RAID controller is a hardware device or software program used to manage hard disk drives (HDDs) or solid-state drives (SSDs) in a computer or storage array so they work as a logical unit. In hardware-based RAID, a physical controller is used to manage the RAID array.
