NEW QUESTION: 2

The primary - foreign key relations are used

- A. To cleanup the database
- B. For the cross-reference of database tables
- C. To index the database

Answer: B

NEW QUESTION: 3

HOTSPOT

You have an Azure website that runs on several instances. You have a WebJob that provides additional functionality to the website.

The WebJob must run on all instances of the website.

You need to ensure that the WebJob runs even when the website is idle for long periods of time.

How should you create and configure the WebJob object? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

* You can run programs or scripts in WebJobs in your App Service web app in three ways: on demand, continuously, or on a schedule.

* For continuous WebJobs there is an important feature called "always on" which is only available for a Standard Website, this will make sure your Website and WebJob are always up.

NEW QUESTION: 4

Which statement about OTV is true?

- A. OTV data group can operate only in PIM sparse-mode.
- B. The overlay interface becomes active immediately when it is configured.
- C. The interface facing the OTV group must be configured with the highest MTU possible.
- D. The overlay interface becomes active only when configuration

in complete and it in manually enabled.

Answer: D

Explanation:

OTV has the following configuration guidelines and limitations:
If the name device serves as the default gateway in a VLAN interface and the OTV edge device for the VLAN is being extended, configure OTV on a device (VDC or nswitch) that is separate from the VLAN interface (SVI).

When possible, we recommend that you use a separate nondefault VDC for OTV to allow for better manageability and maintenance.

An overlay interface will only be in an up state if the overlay interface configuration is complete and enabled (no shutdown). The join interface has to be in an up state.
