You can free download the demos to check that how wonderful our DCP-115C learning preparation is, You may always complain that time is limited for you on account of school work or work pressure.

Save Time With ExamOut DCP-115C Braindumps, APP version of DCP-115C VCE dumps: This version is also called online test engine and can be used on kinds of electronic products.

With our DCP-115C exam questions, you will soon feel the happiness of study, One day you may find that there is no breakthrough or improvement of you work and you can get nothing from your present company.

You can easily grab what is the most important point in the targeted actual exams, Many candidates attended DCP-115C certification exam once but failed.

NEW QUESTION: 1

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

The domain contains the user accounts shown in the following table.

Computer2 contains the local groups shown in the following table.

The relevant user rights assignments for Computer2 are shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services.

Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services.

Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.
