NEW QUESTION: 2

You create a Infopath farm template on a sharepoint server 2010 spl farm.

You need to create a cross domain data connection that uses infopath forms services IPFS for the farm.

What should you do? (To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

Explanation:

Explanation/Reference: To make cross-domain data connection from a Web browser form, data connection settings must be stored in a data connection file in a data connection library. By default, files in a data connection library must be approved before they can be used, by using the content approval feature in SharePoint Server 2010.

To create a data connection file, perform the following procedures:

- 1.Create a data connection library to store data connections.
- 2.Create a form template.
- 3.Add the intended data connection to the form template.
- 4.Convert the data connection to a data connection file.

NEW QUESTION: 3

Prior to an amniocentesis, a fetal ultrasound is done in order to:

- A. Evaluate the amount of amniotic fluid
- B. Locate the position of the placenta and fetus
- C. Ensure that the fetus is mature enough to perform the amniocentesis
- D. Evaluate fetal lung maturity

Answer: B

Explanation:

Explanation/Reference:

Explanation:

(A) Amniocentesis can be performed to assess for lung maturity. Fetal ultrasound can be used for gestational dating, although it does not separately determine lung maturity. (B) Ultrasound can evaluate amniotic fluid volume, which may be used to

determine congenital anomalies. (C) Amniocentesis involves removal of amniotic fluid for evaluation. The needle, inserted through the abdomen, is guided by ultrasound to avoid needle injuries, and the test evaluates the position of the placenta and the fetus. (D) Amniocentesis can be performed as early as the 15th-17th week of pregnancy.
