Joe imports records for Sara, a non-active user. Sara's records

will be assigned to Joe.

A. False

B. True

Answer: B

NEW QUESTION: 3

Universal Containers (UC) is planning to end-of-life a subscription Product by preventing any new sales of the Product. UC wants to allow renewals if a customer has already purchased the Product.

How can the Admin meet this requirement?

A. Create an end-of-life checkbox on the Product, then create a Search Filter to exclude any Product marked end-of-life from Product Selection.

B. Deactivate the Product since CPQ allows inactive Products to be renewed.

C. Create a new renewal Product, then link it to the end-of-life Product by using the Renewal Product lookup.

D. Delete the Product so it is unavailable for new business Quotes.

Answer: B

NEW QUESTION: 4

Note: This question is part of a series questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage a virtual network named Vnet1 that is hosted in the West US Azure region.

VNet hosts two virtual machines named VM1 and VM2 run Windows Server.

You need to inspect all the network traffic from VM1 to VM2 for a period of three hours.

Solution: From Azure Network Watcher, you create a connection monitor.

Does this meet the goal?

A. YES

B. NO

Answer: A

Explanation:

Explanation

Azure Network Watcher provides tools to monitor, diagnose, view metrics, and enable or disable logs for resources in an Azure virtual network.

Capture packets to and from a VM

Advanced filtering options and fine-tuned controls, such as the ability to set time and size limitations, provide versatility. The capture can be stored in Azure Storage, on the VM's disk, or both. You can then analyze the capture file using several standard network capture analysis tools.

Network Watcher variable packet capture allows you to create packet capture sessions to track traffic to and from a virtual machine. Packet capture helps to diagnose network anomalies both reactively and proactively.
