You have a database named Sales that contains the tables as shown in the exhibit. (Click the Exhibit button.)

You need to create a query for a report. The query must meet the following requirements:

- * Return the last name of the customer who placed the order.
- * Return the most recent order date for each customer.
- * Group the results by CustomerID.
- * Order the results by the most recent OrderDate.
- * Use the database name and table name for any table reference.
- * Use the first initial of the table as an alias when referencing columns in a table.

The solution must support the ANSI SQL-99 standard and must NOT use object identifiers.

Part of the correct T-SQL statement has been provided in the answer area. Complete the SQL statement.
