A customer is configuring CAR costing for call. When the customer runs the costing reports calls are not being tagged correctly. Which two changes allow proper costing to be determined for these calls? (Choose two)

- A. Overlapping area code on the trunks must be removed
- B. The items are out of order and must be sorted with the most specific at the top
- C. All external patterns must be changed to include the outside access code
- D. The toll free area code field must be updated to include all toll free area codes
- E. A new local pattern must be added with the pattern "k!"
- F. A new pattern must be added for the 914 and 625 area codes

Answer: D,E

Explanation:

Choose System > System Parameters > Dial Plan Configuration.

The Dial Plan Configuration window displays.

In the Toll Free Numbers field, enter the numbers in your dial plan that can be placed without a charge.

If the number of digits dialed equals 10 and the pattern is K! (more than one digit, in this case a 10-digit number that starts with a trunk code), the call gets classified as Local.
