NEW QUESTION: 1

What does a security benchmark help define?

- A. The Baseline, or "as is" state
- B. Which step of the DRP to execute first
- C. What parts of the Baseline are appropriate
- D. Whether or not the organization should implement ISCM

Answer: C

NEW QUESTION: 2

You need to ensure that Azure Data Factory pipelines can be deployed. How should you configure authentication and authorization for deployments? To answer, select the appropriate options in the answer choices.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

The way you control access to resources using RBAC is to create role assignments. This is a key concept to understand - it's how permissions are enforced. A role assignment consists of three elements: security principal, role definition, and scope. Scenario:

No credentials or secrets should be used during deployments
Phone-based poll data must only be uploaded by authorized users from authorized devices
Contractors must not have access to any polling data other than their own
Access to polling data must set on a per-active directory user basis
