#### **NEW QUESTION: 1**

A company is attempting to determine if there is a cause-and-effect relationship between scrap value and output produced. The following exhibit presents the company's scrap data for the last fiscal year: The company's scrap value in relation to the standard monetary value of output produced appears to be:

- A. A semi-fixed cost
- B. Unrelated to the standard monetary value of output.
- C. A fixed cost.
- D. A variable cost.

**Answer: B**

Explanation:

There is no systematic relationship between standard monetary units shipped and the percentage of scrap. A company wants to determine its marketing costs for budgeting purposes. Activity measures and costs incurred for 4 months of the current year

are presented in the table below. Advertising is considered to be a discretionary cost.

Salespersons are paid monthly salaries plus commissions. The sales force was increased from 20 to 21 individuals during the month of May.

**NEW QUESTION: 2**

An internet-based attack using password sniffing can:

- A. enable one party to act as if they are another party.
- B. result in major problems with billing systems and transaction processing agreements.
- C. cause modification to the contents of certain transactions.
- D. be used to gain access to systems containing proprietary information.

**Answer: D**

Explanation:

Password sniffing attacks can be used to gain access to systems on which proprietary information is stored. Spoofing attacks can be used to enable one party to act as if they are another party.

Data modification attacks can be used to modify the contents of certain transactions. Repudiation of transactions can cause major problems with billing systems and transaction processing agreements.
