Explanation:

A: Before you deploy an operating system image in Configuration Manager, consider the following factors to plan the deployment:  
Operating system image size

Cache size of the Configuration Manager client

Capturing the user and computer state

Windows User State Migration Tool (USMT) package

Task sequence deployment

C: The System Preparation (Sysprep) tool is a technology that you can use with other deployment tools to install Windows operating systems onto new hardware. Sysprep prepares a computer for disk imaging or delivery to a customer by configuring the computer to create a new computer security identifier (SID) when the computer is restarted. In addition, Sysprep cleans up user and computer-specific settings and data that must not be copied to a destination computer.
