NEW QUESTION: 1

A network administrator creates a virtual machine from a template that has SQL Server installed.

You need to ensure that you can create SQL Server databases on the new virtual machine.

Which two actions should you perform to complete the server configuration? Each correct answer presents part of the solution.

- A. Execute the SP_ADDSERVER statement.
- B. Execute the SP_DROPSERVER statement.
- C. Run setup.exe and specify the upgrade option.
- D. Edit the Instance Names registry key.
- E. Execute the SP_SERVER_DIAGNOSTICS statement.

Answer: A,B

Explanation:

Explanation/Reference:

All you should need to do is run sp_dropserver then sp_addserver to change the server name after the template is renamed. The restart the SQL instance.

```
exec sp_dropserver 'OldserverName'
```

```
go
```

```
exec sp_addserver 'NewServerName', 'LOCAL'
```

```
go

NEW QUESTION: 2

Which TCP mechanism prevents the sender from sending data too quickly for the receiver to process?

- A. Congestion control
- B. Selective acknowledgement
- C. Error detection
- D. Flow control

Answer: D

Explanation:

In data communication, flow control is the process of managing the rate of data transmission between two nodes to prevent a fast sender from overwhelming a slow receiver. It provides a mechanism for the receiver to control the transmission speed, so that the receiving node is not overwhelmed with data from the transmitting node.

NEW QUESTION: 3

KW Ltd. entered into a lease agreement for an asset with a useful life of 4 years. The asset has a fair value of \$240,000 and a guaranteed residual value of \$50,000. The lease term is 3 years. The lease is classified as a finance lease. The lease payments are \$47,500 per year, payable at the end of each year. The lease is discounted at a rate of 10%. The present value of the guaranteed residual value is \$38,000. The present value of the lease payments is \$124,000. The present value of the lease liability is \$162,000. The present value of the lease asset is \$124,000. The present value of the lease liability is \$162,000. The present value of the lease asset is \$124,000. The present value of the lease liability is \$162,000.

- A. US \$ 38,000
- B. US \$ 44,000
- C. US \$ 55,000
- D. US \$ 47,500

Answer: D

Explanation:

Depreciation should be consistent with the accounting policy for owned assets. Absent a reasonable certainty that the lessee will own the asset at the end of the lease term, it should be fully depreciated over the shorter of the useful life or the lease term. The lease does not transfer ownership or contain a bargain purchase option. Accordingly, the period of amortization should be the lease term. In accordance with the straight-line method used by KW for owned assets, the depreciable base for this finance lease is equal to the US \$240,000 initially recorded minus the US \$50,000 guaranteed

residual value allocated equally over the 4-year lease term. Consequently, annual depreciation expense is US \$47,500 [(\$24,00,000 - \$50,000) - 4 years]. On January 1 Plantation Partners is planning to enter as the lessee into the two lease agreements described in the opposite column. Each lease is noncancelable, and Plantation does not receive title to either leased property during or at the end of the lease term. All payments required under these agreements are due on January 1 each year.
