NEW QUESTION: 2

When a client calls and describes a problem with a computer not being able to reach the Internet, in which of the following places of the OSI model would a technician begin troubleshooting?

- A. Network layer
- B. Transport layer
- C. Physical layer

D. Session layer

Answer: C

Explanation:

Explanation/Reference:

Explanation:

The bottom layer of the OSI reference model is Layer 1, the physical layer.

The physical layer is the layer that defines the hardware elements of a network.

These elements include:

Network Interface Cards

Network topology

Network cabling

The type of signals used for data transmissions

When troubleshooting a network connectivity issue, the first thing you would check is the computer's network cabling, the network card etc. In other words, the computer's physical connection to the network.

NEW QUESTION: 3

The BC/DR kit should include all of the following except:

A. Hard drives

B. Documentation equipment

C. Annotated asset inventory

D. Flashlight

Answer: A

Explanation:

Explanation

While hard drives may be useful in the kit (for instance, if they store BC/DR data such as inventory lists, baselines, and patches), they are not necessarily required. All the other items should be included.
